## OBJECTIVE

A challenging position effectively utilizing my work experience. An opportunity to work and develop in an innovative technological environment that encourages the individual employee to grow both personally and professionally.

## EXPERIENCE

### L3Harris— Software Engineer

March 2023 - PRESENT

- Contributed to the design and integration of a Pub Sub architecture system using AWS services to automate report generation, ensuring system scalability and reliability.
- Achieved a time savings of up to 77% and facilitated a monthly revenue increase of 13% through automation and efficient data utilization to significantly reduce manual data input requirements.
- Developed and maintained scalable and efficient backend services using cloud-native technologies in AWS.
- Acted as Frontend Lead building scalable, reusable, and maintainable frontend solutions, reducing codebase size by 20%.

### Fourth Phase — Frontend Developer

June 2022 - March 2023

- Core developer for multiple retainer projects that involved maintaining and modernizing existing high traffic Shopify sites.
- Implementation of Shopify data objects to automate data-driven workflows and create dynamic user engaging features resulting in an increase of traffic by 20%.
- Increasing speed of content and media teams by creating in depth sections to allow for users to use the Shopify visual interface to edit and make content updates without needing a developer.
